HP CO2 Confetti Blaster

HP Co2 Confetti Launcher

Creates a storm of Confetti up to 90 feet into the air. These systems have been known to black out the sun in a Football Stadium! The dual barrels can be angled from 45 degrees to 90 degrees in 15 degree increments. Launchers are supplied with dual horns, two high pressure hoses, shut off valves, confetti hopper and all fittings.

Compressed Air Confetti Launcher

Compressed Air/CO2 Confetti Launcher

Projects showers of confetti, Nurf Balls, T-Shirts, feathers and even paper money 40 to 60 feet into the air. A system comes complete with barrel, air tank, safety cable, pressure relief valve, pressure indicator gauge and swivel stand. The stand has 1/2 holes strategically located to accommodate c-clamps for vertical or horizontal truss mounting. One cannon may accept up to 4 additional barrels for multiple discharges. System may be operated with compressed air or Co2 gas. With the use of regulated air or Co2 supply multiple shots can be obtained. The firing of empty barrels appears to give the sound of cymbals crashing. The sound is widely used to create excitement.

SPECS: single barrel unit
 27"W x 35"H x 11" D
 110vac @ 1amp 28Lbs.

SPECS:
 W x H x D
 12" x 40" x 37"
 12" x 59" x 39"
 12" x 72" x 48"
 Weight: 74, 60, 46 LBS.

Optional road case
